it all starts with a

vision

VISION FITNESS®

HOME TREADMILLS

SIMPLE	RELIABLE	COMFORTABLE

THE *vision fitness* DIFFERENCE

Whether your vision is a slimmer body, a healthier heart, stress management, or if you simply enjoy exercise, Vision Fitness has the treadmill to help you achieve your goals.

We began as a division of the Trek® Bicycle Company, where we pioneered the development of the smoothest, quietest, and most comfortable fitness bikes available. In 1996, Vision Fitness was spun off by the Trek® Fitness management team to continue to bring to market innovative fitness products. We offer you the same combination of quality, value, and performance that has made our founding company the most requested bicycle brand in America.

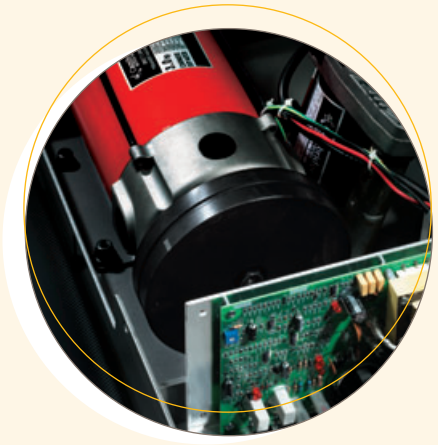
We broke into the treadmill market with the same quality and industry-leading features that we offer on our fitness bikes and elliptical trainers. Try an award-winning Vision Fitness® treadmill at your local specialty fitness retail store. We are confident you will agree with the thousands of satisfied users and find our treadmills are the simplest, most reliable, and most comfortable you have ever used.

To learn more about Vision Fitness and our complete line of quality fitness products, please visit our website: **www.visionfitness.com.**

The mission was clear: develop the most simple, reliable, and comfortable treadmill in the market. To do this, we first developed motivational programming to keep you going that extra mile. Then, we studied how we could keep the entire treadmill drive system cool and, thus, more reliable. To achieve this, we designed ventilated motor covers with large, roomy motor compartments. Finally, we redesigned how a treadmill offers cushioning with our eight strategically placed variable-durometer elastomer cushions.

Simple

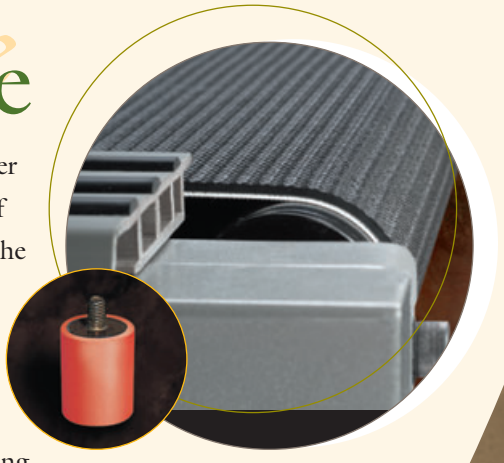
Our Smart-Matrix™ LED consoles are easy to use, giving you all the information you need to achieve your goals. All models have one-touch speed & elevation Quick Keys, making adjustments during your workout simple. Some models even store your workout totals, so you can track your progress over time.



Reliable

We take a No-Compromise approach to the selection of every component used in our treadmills. This all starts by using only key component suppliers with years of treadmill manufacturing experience. An example of this is the DCI™ console devices that we use on many of our models. DCI is the premier manufacturer of electronics for the fitness industry.

Comfortable



Our variable-durometer (softness) elastomer system gives you just the right amount of cushioning for a comfortable workout. The softest elastomer is located where your foot contacts the deck; while the firmest is in the back to offer support. For added comfort, our ***T9600HRT Comfort*** and ***T9450HRT*** have our extra shock-absorbing orthopedic belt.

When Vision Fitness burst onto the treadmill scene, we had the largest and heaviest treadmills in our segment. We were proud to be called "big" and "heavy" by our competitors. You see, we believe that our larger workout area makes for a more comfortable workout, while our heavy gauge steel frame creates a truly stable workout surface.

Our ***T9200*** has a simple large-LED console to give you the feedback that you need, while our popular HRT® Series utilizes our Smart-Matrix™ LED console with built-in Heart Rate Training and Custom User Profiles. Our ***T9700*** Series even has a User Log-in button that actually accumulates and stores your workout totals.

Vision Fitness understands that a quality treadmill is a large investment, and it must be reliable and maintainable year after year. Our treadmills have large motor compartments with ventilated covers and 2.5" rollers. This keeps the key components (motor, lower board, elevation motor, deck, belt) running cool and insures a more reliable, longer lasting treadmill. Our low-maintence pre-waxed decks are designed to hold up for hundreds of hours of use (based on user's weight and workout speed) without ever needing service. Our decks can easily have wax reapplied if needed, and you can flip the deck on our popular ***T9600*** and ***T9700*** Series treadmills.

It isn't enough to design the best treadmills with the best components. They must also be assembled to exacting tolerances. Most Vision Fitness® treadmills are assembled in an ISO 9001-certified manufacturing facility.

Our Smart-Matrix™ LED consoles have large LED windows for both Speed and Elevation, while providing other feedback such as Time, Distance, Pace, Calories, Average Speed and Heart Rate. Our preset motivational programming keeps you going and allows you to adjust your speed and elevation anytime during the workout without leaving the program. Most of our models have Heart Rate Training programs and Custom User programs. Our ***T9600HRT Comfort*** and ***T9700*** Series offer contact heart rate feedback for an easy check of your heart rate.

Our ***T9700 Runner*** treadmill boasts programming written by Rod DeHaven, a U.S. Olympic Trials Marathon Champion. So, whether your goal is an enjoyable walk, or training for the next marathon, Vision Fitness has the treadmill for you.

To come to be you must have a vision of Being… You will become what your vision is.

Heavy gauge steel frame makes for a solid, stable base
Front transport wheels for easy mobility
Large *continuous-duty* motors
Variable-durometer elastomer cushioning system assures a comfortable workout
Non-slip side rails for extra security
2.5" rollers and 1"-thick deck ensure reliability
Extra-large running surface

What separates Vision Fitness® treadmills from all others? It's in the details. When we developed our treadmills, we asked what really makes a treadmill perform and help its users achieve their objectives. It sounds like a silly question, but the staff at Vision Fitness lives and breathes finding the best answer to that seemingly simple yet complex question.

So, you'll find an extra-heavy gauge steel frame, variable-durometer elastomer cushioning, PWM electronics, motivational programs, front transport wheels, center-positioned elevation rack, and many other distinguishing features on Vision Fitness® treadmills.

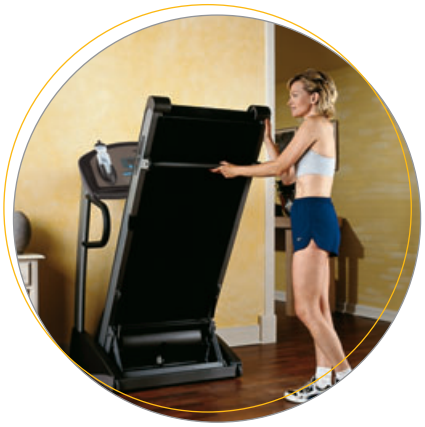
Vision Fitness realizes that not everyone has the space for our full-platform treadmills. So, we designed a line of folding treadmills that integrates many of the features of our larger treadmills but folds out of the way when not in use. With Vision Fitness, you don't have to sacrifice performance just because you don't have space.

The Vision Fitness® line of folding treadmills–from our entry-level ***T9250*** to our fully-programmed Heart Rate Training ***T9450HRT*** treadmill–helps you achieve your fitness goals.

Vision Fitness knows that 80% of people stop working out and do not reach their goals due to boredom. Being comfortable on your treadmill will keep you working out longer and help you achieve your fitness goals sooner. Vision Fitness® treadmills boast large workout surfaces with front and side-rail handlebars.

Our exclusive variable-elastomer cushioning system provides just the right amount of comfort to keep you going. We have designed our eight-elastomer system to make sure that we offer cushioning where your foot strikes and support where it doesn't. This assures that you get a comfortable workout, not that "walking on sand or concrete" feel. In addition to our cushioning system, features such as motivational programming and built-in waterbottle holders (waterbottle included), help you achieve your fitness goals sooner. It is amazing how quickly those extra minutes add up toward achieving your goal.

Our easy-to-use *folding* system allows you to unfold our treadmills by simply lifting the latch and lowering the treadmill deck. It's that easy! Now you're ready for your workout. When you're done, simply lower the Elevation to zero and fold up; the locking mechanism will click into place. That's it!
Now, if only your *workout* were that easy…



If you have a vision,
do something with it.

Anthony J. D'Angelo

What separates Vision Fitness® treadmills from all others? It’s passion -- the passion to develop the best treadmill ever. This passion shows in the details that go into every Vision Fitness® treadmill, whether it is the programming in our consoles that allows you to stay motivated by giving you constant feedback, our eight variable-durometer elastomers for cushioning, or simply our side rail endcaps made of durable steel. Take a walk or run on a Vision Fitness® treadmill, and you will feel the passion.
